Hoa Bui

Los Angeles, CA · hoaqbui@gmail.com · linkedin.com/in/hoaqbui

Senior Technical Product Manager · AI creative tools, graphics and 3D pipelines: film, games, AI.

Summary

About 18 years building the tools and pipelines artists use to make things: film at Lucasfilm and Pixar, then almost 13 years at Riot Games, and now AI. At Riot, set up the outsourcing partnership that now makes almost all of League of Legends' skins, led 50+ artists and engineers as lead producer, and was team captain on League's tools teams. Looking for product leadership on creative tools, especially AI video and generative tools.

Experience

Riot Games — Los Angeles, CA · Jan 2014 – Sep 2026

Senior Technical Product Manager · Sep 2022 – Sep 2026

Team captain and general producer for League of Legends tools teams, alongside technical product manager (TPM) responsibilities, with the final call on priorities for each. Cut League map greybox from weeks to under an hour; it became the studio default.

- **Map Tooling** (Nov 2025 – Sep 2026): team captain for the co-located team building map tools for Summoner's Rift, League's main map.
- **Workflow & Capabilities** (Nov 2024 – Nov 2025): team captain across two teams, Creator Workflows and Hextech Graphics, in a time-boxed collaboration between the gameplay and engine orgs. Up to 20 people across leads, tech artists and engineers.
    - Overhauled the scene editor's UX with a UX designer so level designers and artists could build maps in it.
    - Added modern engine tooling and rendering features, including PBR and lighting tools.
- Creator Workflows, Gameplay Tools (Nov 2022 – Nov 2024): TPM and sole producer for a hybrid team of 4 internal and 4 external developers, plus outsourcing.

Lead Producer, unannounced project · Jan 2022 – Nov 2022

- Led 50+ artists and engineers. Accountable for all of Art, including Audio, and for art-domain engineering: rigging, VFX, rendering.
- Set goals and made calls with OKRs while the organization's direction was unclear.
- Built partnerships with external development studios.

Technical Product Manager, Player Immersion & Expression (PIE) Tooling · Oct 2019 – Sep 2022

Tools and pipeline for PIE, League's content team, which shipped all of League's content, including the skins catalog, on a two-week release cadence. Halved cost per asset at twice the capacity, and scaled the team from 2 to 12.

- Set up the content team's outsourcing arm.
- Vetted, selected and signed Virtuos Sparx as an outsourcing partner, chartered the workstream, and made it scale: security, operations, a working agreement between the studios, and alignment. Sparx now produces almost all of League's skins.

Senior Technical Artist · Jan 2014 – Oct 2019

- Built a headless scene-cleanup framework and library, plus map cleanup tools on top of it.
- Wrote UI/UX plugins for the content pipelines and ported tool UIs to PySide.
- Built the artist setup installer and migrated the pipeline to Maya 2018.
- Front-line support for artists through the ask channel; partnered with QA; ran the team's agile rituals.

Pixar Canada — Vancouver, BC · Mar 2012 – Oct 2013

Render Technical Director

- Fixed, optimized and delivered shots for final rendering and stereo approval.
- Built, ported and maintained tools for the rendering group; worked with lighters to improve lighting efficiency.
- Designed tools and workflows for gaps in the pipeline, built so artists could take them over.

Lucasfilm Animation — Nicasio, CA · Feb 2009 – Mar 2012

Assistant Technical Director, Star Wars: The Clone Wars

- Built tools and protocols to produce and transfer large volumes of digital assets to a strict quality bar, on deadline.
- Co-wrote a new rigging and shading asset spec with leads and supervisors so studios could share assets.
- Automated converting vendor assets into the internal asset library.
- Improved the Singapore studio's productivity through site visits and process analysis.

ImageMovers Digital — Novato, CA · Jul 2008 – Feb 2009

Resource Technical Assistant, A Christmas Carol

- Ran a 500+ machine render farm; helped design a MySQL database for render statistics.

Electronic Arts — Redwood City, CA · May 2007 – Jul 2007

Technical Artist Intern, The Simpsons Game

- Look development, shading, lighting and rendering for cinematics; QA on outsourced assets.

Independent AI projects

- **Parti:** an early-stage multi-agent orchestration system that runs a research, plan, implement, verify and evaluate loop across a three-node home lab: a Mac Studio, a GB10 workstation and a NAS.
- **Mac-native AI video app:** a privacy-first video generation product with a cloud GPU backend. Working prototype.
- **Manga-to-video pipeline:** turns comic pages into storyboarded video using ComfyUI, LTX and automatic panel detection.
- **nen:** a manifest-driven tool that sets up a dev machine from scratch, idempotently.

Skills

- **Product, leadership and production:** product management, team captaincy across matrixed teams, outsourcing and vendor partnerships, two-week live release cadence, OKRs, agile.
- **Pipeline and tools:** graphics and 3D content pipelines, scene editors, PBR and lighting tooling, Python, C++, PySide/Qt, Maya, RenderMan.

- **AI tooling:** multi-agent orchestration, Claude Code, ComfyUI, LiteLLM, local and cloud GPU inference.

Certifications

- ICAgile Certified Professional – Agile Coaching (ICP-ACC), 2023
- ICAgile Certified Professional – Agile Team Facilitation (ICP-ATF), 2018
- ICAgile Certified Professional – Agile Testing (ICP-TST), 2017
- ICAgile Certified Professional (ICP)

Speaking

- Speaker, XDS (External Development Summit), Vancouver, Sep 2018

Education

The Art Institute of California — San Francisco · B.S., Visual and Game Programming, graduated with honors, 2008
